PUBLIC NOTICE TO CUSTOMERS/CONSUMERS Notice of All Drought Contingency Restrictions Lifted

June 18, 2024

As you are aware, the State of Texas has been experiencing unprecedented drought. Because of this the Palo Pinto County Municipal Water District No. 1 and the City of Mineral Wells have been monitoring the lake continually. In the last 30 -45 days we have received significant rain on Lake Palo Pinto and its watershed. The lake has filled to 100% capacity and therefore the City of Mineral Wells has sent out notification of the lifting of all water use restrictions in the following press release.

From the City of Mineral Wells....

Media Release, June 10, 2024 - Drought conditions lifted at Lake Palo Pinto, MW moves to Stage 0

"The Palo Pinto County Municipal Water District No. 1 has determined that requirements for termination of Drought Response Stage 1 – Mild Water Shortage Conditions have been satisfied," Huffman wrote in June 10 letter to the Palo Pinto Press. "Beginning Monday, June 10, 2024, at 12:01 a.m., Lake Palo Pinto Will no longer be subject to any drought conditions under the District's Water Conservation and Drought Contingency Plan."

Stage 1 may be rescinded when certain drought conditions have ceased for ten consecutive days, according to the plan. Mineral Wells City Manager Dean Sullivan said that means the water conservation level moves to "Stage 0 – Normal Water Conservation" for the city. Voluntary conservation is encouraged. As of today, Lake Palo Pinto is at full capacity. Due to this, all water use restrictions are now terminated.

The Millsap Water Supply Corporation, in cooperation and agreement with the City of Mineral Wells, is....

Terminating all water use restrictions effective June 10th, 2024
